(a) Theorem 10: Post-Scaled LASSO sqrt(2)-Shortcut
Post-Scaled $\lambda_3^{\text{entry}}/\lambda_1^{\text{entry}} \to \sqrt{2}$
Proposed GS-Orthogonal (0.0)
$M_{\text{crit}} = 1/\sqrt{2} \approx 0.707$
(b) Stepwise AIC Main-Effect Drop Zone
Raw $\Delta\text{AIC}_1(M_2)$
